JCB Carpet Cleaning

PROFESSIONAL RESIDENTIAL
CLEANING SERVICES

Keep your carpets and rugs looking their best with proper regular cleaning. Dirt and debris will reduce the life of your carpet and can pose a risk for the development of allergies or asthma. Regular vacuuming alone cannot remove all of the dirt and debris so it is generally recommended that you get carpets professionally cleaned once per year.

JCB service technician will pre-inspect your areas of concern as well as noting carpet construction. JCB Cleaning will also advise you of any possible permanent staining. We will move furnishings that can be safely moved within personal safety and drying purposes. Furniture we move will be protected with disposable blocks and tabs. If needed, high traffic areas and spots will be pretreated for better soil and spot removal.

Only JCB Cleaning shampoos your carpets first, then uses a state-of-the-art hot water extraction processes that thoroughly cleans and flushes the carpet pile for maximum cleaning with minimal carpet dampness. We deodorize and disinfect your carpets as well as treat them with environmentally safe products. Your home will smell fresh and clean.

If any spots remain after the cleaning process, specialty cleaning techniques are employed.

Note: Permanent stains identified by our service technician may not be removed.

Securely Serving Northeast Ohio:

We utilize state-of-the-art telephone time-tracking systems and software that record when an employee is on the job and for how long. All technicians are employees of JCB Cleaning and have passed background checks. We are fully insured and bonded to ensure that no damage or injury falls back on you.
